Harmonize Your Print & Mail Factories with **Chemistry™ Platform Solutions**

Database-driven output management system designed to manage, track and report on jobs through production workflows from onboarding to final delivery.

Output management solution combining integrated connectivity with fast, accurate print stream conversions and job routing & tracking capabilities.

Optimizes fonts, images, objects, colors and resources to allow PDF files to process more efficiently for production printing, ePresentation and archiving.

Allows print job submission through a secure bi-directional channel for communicating with printers using encrypted pathways that help ensure your print data stays secure.

Powerful AFP transform engine that routes mainframe and AS/400 print reports directly to network and production PostScript printers, viewing stations and archive systems.

The Solimar Chemistry platform provides workflow automation and factory visibility.

Chemistry's products are modular, scalable, off-the-shelf configurable for rapid onboarding.
